

Professional Summary

Business-oriented undergraduate and founder of GrabKrt, a nationwide e-commerce startup, managing business operations including vendor onboarding, market research, pricing strategies, marketing outreach, and customer experience. Skilled in studying market trends, turning customer and vendor feedback into data-based suggestions, and working with technical teams to connect business goals with product development. I have a solid background in managing stakeholders, solving problems, and collaborating across teams. I am looking for a Business Analyst position to use my analytical skills, business knowledge, and practical startup experience to support informed decision-making and business growth.

Projects

Business -Model :GrabKrt – Founder (Personal Startup)

2025 – Present

Business & Market Analyst | Pan-India e-commerce ecosystem | GrabKrt (Play Store Closed Testing)

- Led non-technical operations for a pan-India e-commerce venture, focusing on vendor onboarding, market research, and customer-facing outreach while coordinating closely with the technical co-founder on product priorities.
- Conducted market and competitor analysis to inform pricing and positioning decisions, tracking findings and vendor/order data in Excel for review with the founding team.
- Acted as the bridge between ground-level business requirements (vendor needs, customer feedback) and the technical team, translating operational issues into feature and process improvements.
- Analyzed customer behavior, purchasing patterns, and feedback to identify service gaps, improve the user experience, and recommend initiatives aimed at increasing customer engagement and retention.
