

Kunal

Full Stack Developer

+91 98965 59630 | kunalkaushik860@gmail.com | [linkedin/Kunal](https://www.linkedin.com/in/Kunal) | [github/kunalgkk](https://github.com/kunalgkk) | Rohtak, Haryana

PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Science Engineering student experienced in building end-to-end web applications with modern technologies. Proficient in Java, Python, and C++ with strong fundamentals in Data Structures & Algorithms and Object-Oriented Programming. Shipped two production full-stack products from concept to deployment, including a live home-services marketplace and a GPS-based fitness platform with real-time global leaderboards. Seeking a Full Stack Developer role to build scalable, high-performance software.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Responsive Web Design, REST API Integration

Backend & Databases: Express.js, Node.js, Firebase (Firestore, Realtime Database), PostgreSQL, SQL, RESTful APIs

Tools & Platforms: Git, GitHub, Google Maps API, Geolocation API, VS Code

Core CS: Data Structures & Algorithms, OOP, Computer Networks

FULL-STACK PROJECTS

One Solution – Home Services Web Application | [GitHub](#) | [Live Link](#)

2025 – 2026

- Built and deployed a full-stack, on-demand home services web application connecting local service providers (carpenters, plumbers, electricians, and more) with customers.
- Developed a responsive, user-friendly frontend using JavaScript, HTML, and CSS, with a booking and service-request workflow spanning the full client-to-server stack.
- Designed backend data models and storage using Firebase/SQL-based systems to manage bookings, user profiles, and service listings in real time.
- Deployed the application to a live production environment, handling end-to-end functionality from UI to data persistence.

TerritoryFit – GPS-Based Fitness Gamification Platform | [GitHub](#)

2025 – 2026

- Designed and built a full-stack web application that turns everyday running/cycling routes into a competitive game by letting users claim real-world roads, streets, and tracks as personal "territories" using live map data.
- Implemented a territory-ownership algorithm that awards each route segment to the user with the highest cumulative number of runs on that segment, using GPS-based route matching and frequency tracking.
- Built a personal analytics dashboard showing each user's pace, session timing, distance covered, and calories burned, along with data-driven suggestions for performance improvement.
- Engineered a global leaderboard, open to all users worldwide, ranking players by territories claimed and total distance to drive community-wide engagement and competition.
- Integrated Google Maps/Geolocation APIs for real-time route tracking and Firebase Realtime Database for live leaderboard and territory-ownership updates across the full stack.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science Engineering (Specialization in AI&ML) — CGPA: 8.59

Sep 2023 – May 2027

Greenland Public School

CBSE — Class XII: 77.4% — Class X: 95.4%

Apr 2021 – Apr 2023

LEADERSHIP & ACTIVITIES

Founder & Business Analyst, GrabKrt – led non-technical operations (vendor onboarding, market research, outreach) for a pan-India e-commerce venture.

PR & Outreach Member, Linux Club, VIT Bhopal – organized sponsors and guest coordination for the university's flagship fest and maintained all the records or reports of the event.

Volunteer, NSS Unit, – managed crowds/donors at a blood donation camp and supported a 10,000-sapling plantation drive.

HACKATHONS & CERTIFICATIONS

Participant – HackShastra (Unstop), CyberShield Hackathon (VIT Bhopal), Sandisk Hackathon (HackerEarth).

NPTEL Cloud Computing – Elite Certificate (IIT Kharagpur)

Applied Machine Learning in Python – University of Michigan
