

Kunal

Software Engineer

Rohtak, Haryana, India | kunalkaushik86o@gmail.com | +91 9896559630 | linkedin.com/in/Kunal | github.com/kunalgkk

Professional Summary

Product-focused Software Engineering undergraduate and co-founder of **GrabKrt**, a pan-India e-commerce startup. Experienced in leading business operations, customer experience, vendor onboarding, and ground-level execution while contributing to product planning, technical coordination, and platform improvements. Possess a solid foundation in software development and collaborate closely with the engineering team to bridge business requirements with technical implementation. Passionate about building scalable, user-centric products from concept to growth through a combination of operational excellence and technical understanding.

Education

B.Tech in Computer Science Engineering (Specialization in AI&ML), VIT Bhopal University

Sep 2023 – May 2027

CGPA: 8.59

Schooling (CBSE), Greenland Public Schol

Apr 2021 – Apr 2023

Class X: 95.4% Class XII: 77.4%

Technical Skills

Languages: Java, C++, Python

Databases: PostgreSQL, Firebase (Firestore, Realtime DB)

Tools & Cloud: Git, Github, VS code

Libraries: Pandas, Matplotlib, Scikit-learn

Core CS: Data Structures and Algorithms, Computer Networks

Projects

GrabKrt – Founder & Developer (Personal Startup)

2025 – Present

Flutter & Android + Firebase | Pan-India e-commerce ecosystem | GrabKrt (Play Store Closed Testing) | [GitHub](#),

- Developed an e-commerce ecosystem featuring three dedicated apps:
 - Implemented secure authentication, real-time product cataloging, and order tracking using Flutter and Firebase.

Image Compression Model – K-Means Clustering Approach [Python](#) | [GitHub](#)

2025

A machine learning model designed to significantly reduce image size while preserving quality.

- High Compression Efficiency:** Achieved up to 90% reduction in image size with minimal perceptible quality loss.
- Algorithmic Approach:** Implemented K-Means clustering for optimal colour quantization and efficient pixel grouping.
- Practical Application:** Suitable for web platforms, storage optimization, and faster image transmission without heavy computational requirements that could help in saving storage.

One Solution – Home Services Web Application

2025 – 2026

| Full-Stack Developer | [GitHub](#) | [Link](#)

A full-stack web application offering on-demand home services with a focus on connecting local workers to customers.

- Service Coverage:** Enables users to book local professionals such as carpenters, plumbers, electricians, and more.
- Frontend Development:** Built using JavaScript, CSS, and HTML to ensure a responsive and user-friendly interface.
- Core Functionality:** Booking system, service categories, and contact management for both customers and service providers.
- Target Audience:** Specially designed to empower local workers by bringing their services online

Co-Curricular Activities

Tech Member, Haryana Club, VIT Bhopal University

2024

- Lead technical initiatives, managing digital platforms and coordinating with teams to build event-related systems.

Event management, Pahadi Club VIT Bhopal University

- Supported in Managing the event smoothly and outreaching the necessary persons

PR& Outreach memeber, Linux Club, VIT Bhopal University

April 2024–Sep 2024

- Contacted to the guest and served as a key organizer for sponsorer for club, the university's flagship fest.

Hackathons

HackShastra Hackathon (Unstop) – Designed and prototyped a software solution in a timed online hackathon.

Participant

CyberShield Hackathon (VIT Bhopal) – Built security-focused solutions in a university-level hackathon.

Participant

Sandisk (Hackerearth) – working on a simple image detecting idea.

Participant

Volunteering

NSS Unit | VIT Bhopal University

- Contributed to a plantation of 10,000 saplings as a part of large-scale efforts towards environmental conservation, leading to smooth execution as part of the discipline team.
- Controlled the crowd of over 1,000 volunteers and maintained order while creating a successful and well-coordinated plantation drive.
- Also worked as a volunteer in the blood donation camp, managing the crowd or donars for the smooth functioning of event.
