Projects

One Solution – Home Services Web Application | [GitHub](#) | [Link](#)

2025 – 2026

- **Overview:** A full-stack web application offering on-demand home services connecting local workers to customers.
- **Service Coverage:** Enables users to book local professionals such as carpenters, plumbers, electricians, and more.
- **Frontend Development:** Built using JavaScript, CSS, and HTML to ensure a responsive and user-friendly interface.
- **Target Audience:** Specially designed to empower local workers by bringing their services online.

GrabKrt – Founder (Personal Startup)

Business Analyst | *Pan-India e-commerce ecosystem* | *Play Store Closed Testing*

2025 – Present

- Led non-technical operations for a pan-India e-commerce venture, focusing on vendor onboarding, market research, and customer-facing outreach while coordinating closely with the technical co-founder on product priorities.
- Conducted market and competitor analysis to inform pricing and positioning decisions, tracking findings and vendor/order data in Excel for review with the founding team.
- Acted as the bridge between ground-level business requirements (vendor needs, customer feedback) and the technical team, translating operational issues into feature and process improvements.

Certifications

- NPTEL Introduction to IoT – Elite Certificate (IIT Kharagpur)
- Applied Machine Learning in Python – University of Michigan
